## Available Options

### Increased Output Power

The conservatively rated unit allows to deliver extra output with the same reliability. At some

derating, either the maximum output voltage or the maximum output current can be increased by about 10%.

- Order Code - P069

### Sequencer

Arbitrary Waveform generator or standalone automation. The sequencer is integrated in the Ethernet controller.

- Order Code - P150

### Secured Voltage and Current Setting

For a maximum security, the CV/CC settings can be adjusted with a screwdriver only and are protected

with a plastic cap from accidental adjusting.

- Order Code - P001

### Rear Power Output and Remote Sensing

Output terminals at the rear panel instead of bind posts at the front panel, includes remote sensing.

- Order Code ES015-10 - P119
- Order Code ES030-5 - P120
- Order Code ES075-2 - P121
- Order Code ES0300-0.45 - P122

### 19" Rack Mounting Adapter

Using the 19" mounting adapters, it is possible to position the ES units in a 19" rack. Several

configurations possible with multiple ES and / or PSC or ISO AMP modules.

### Software control and Interfaces

Interfaces to be installed by factory:

- RS232 controller - P148
- Ethernet (+ sequencer) - P150
- PROFIBUS controller - P279
- CANBUS controller - P280

External programming interface modules:

- IEEE488 controller module
- ISO AMP module

Notes: 1. Download the special datasheet about Battery Charging from <http://www.DeltaPowerSupplies.com/>.  
2. There is only room for one of the interfaces in a unit, see next page for configurations.
